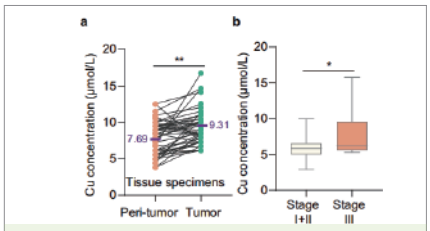
Biochemical Detection Kits



Copper concentration in gastric cancer tissues and adjacent normal tissues was measured by copper ion detection kit (abs580140-96T). The results showed that copper concentration was related to tumor progression.

Copper ion detection kit (#abs580140)

- **Rapid and simple:** the absorbance value was determined by microplate reader
- **Microsampling:** only 140μL, for liquid samples and 100mg for tissue samples
- **High sensitivity:** the copper ions of lumol/L can be detected
- **Wide sample:** serum/plasma, cell lysates/culture supernatants, tissue extracts, etc.
